

To Whom It May Concern:

We feel strongly that the FCC should not implement a proposal that would lessen the protections we receive through the Indiana Telephone Privacy laws. Since we have been on the list of those who do not want unsolicited calls, the number of unwanted calls we receive has dropped to essentially zero. We are thrilled with the results the law has had and are happy to longer be harrassed by telemarketers. We hope that the FCC will reconsider making any proposals that would eliminate this protection.

Sincerely, Susan & Curt Utz
